## Black Annealed Wire (tie wire)

### Black annealed wire

Black annealed wire is one of the most popular baling wires in the recycling industry and because it's easy to use and reduces the burden on the employees. Black annealed wire is very resilient and doesn't corrode easily, which means it has a better shelf life. You can purchase this wire in bulk and store it in your facility without worry of rust or corrosion.

Black annealed wire is also more reliable and doesn't break easily so you won't have to deal with accidents during the tying process. It is specifically manufactured to endure pressure and bear the environmental conditions, which makes it ideal for the construction, agriculture, and recycling industry.
